

Tennessee Drought Update

For the assessment period ending January 10, 2023

This Week's Drought Monitor of Tennessee Map

From the US Drought Monitor, authored by Richard Tinker, NOAA/NWS/NCEP/CPC with input from the Tennessee Climate Office

Continued rainfall throughout the state, led to the removal of the last area of Abnormally Dry (D0) conditions from Tennessee.

Change Since Last Week

Statewide Condition Summary

What's Changed? With most of the state seeing more rain during the drought monitoring period (Tuesday to Tuesday), Abnormally Dry (D0) conditions in Lauderdale County were cleared.

What's New? With the latest rainstorm pushing through, the entire state of Tennessee is now clear on the US Drought Monitor.

What's Next? With most of the state receiving both rain and cooler temperatures heading into the next drought monitor release, we expect the state to remain free of drought conditions.

Statewide Coverage By Category

Category	Coverage This Week	Change Since Last Week
D0: Abnormally Dry	0.00%	-0.36%
D1: Moderate Drought	0.00%	0.00%
D2: Severe Drought	0.00%	0.00%
D3: Extreme Drought	0.00%	0.00%
D4: Exceptional Drought	0.00%	0.00%
