

# Tennessee Drought Update

For the assessment period ending March 14, 2023

## This Week's Drought Monitor of Tennessee Map

From the US Drought Monitor, authored by Brad Rippey, United States Department of Agriculture with input from the Tennessee Climate Office

 Tennessee remains free of any drought conditions.

### Change Since Last Week

# Statewide Condition Summary

**What's Changed?** Most areas of the state saw rain this week with cooler temperatures. There were no changes in this week's drought monitor.

**What's New?** Almost all areas of Tennessee received rainfall, keeping Tennessee out of drought consideration for this week's monitoring period.

**What's Next?** Most areas of the state are expected to receive precipitation in the next drought monitoring period (Tuesday to Tuesday). There is a persistent small area of concern in southwest Tennessee that will continue to be monitored. For now Tennessee will likely continue to be clear on the US Drought Monitor.

## Statewide Coverage By Category

| Category                | Coverage This Week | Change Since Last Week |
|-------------------------|--------------------|------------------------|
| D0: Abnormally Dry      | 0.00%              | 0.00%                  |
| D1: Moderate Drought    | 0.00%              | 0.00%                  |
| D2: Severe Drought      | 0.00%              | 0.00%                  |
