

M.Ed. in Curriculum & Instruction Graduate Program Info for Summer/Fall 2023 (One-Year Path, Online)

The **Master of Education in Curriculum & Instruction** degree program provides a broad opportunity for K-12 education professionals interested in advanced graduate studies as it relates to curriculum and teaching in a variety of educational settings. The M. Ed. in Curriculum & Instruction draws from multiple, interdisciplinary perspectives and is grounded in the foundational study of curriculum theory, an introduction to educational research, multicultural education, equity, inquiry, and contemporary scholarship in curriculum and instruction. The M. Ed. in Curriculum & Instruction seeks to engage and develop scholar-practitioners who embody the values of deep content knowledge, creative and democratic pedagogies, and culturally responsive advocacy working towards equitable and socially just classrooms.

Students are encouraged to tailor their core curriculum with advisor-guided, selected graduate coursework that compliments their professional goals in elementary, middle, and secondary teaching and learning, STEM education, English as a Second Language, and other related educational topics or qualified K-12 add-on endorsement sequences. This program offers a thesis or non-thesis option. At ETSU, a culminating experience is required of all master's degree programs. For the M. Ed. in Curriculum & Instruction, a culminating event (pass/fail) is required of all non-thesis students to be conducted during the last semester of enrollment in the program.

This degree is designed for fully certified education professionals and intended for those who already hold a previous degree in education and the relevant teacher licensure. Students can choose to complete the program in a full-time or part-time approach during the fall, spring, and summer semesters. All courses are available in an online format to accommodate the needs of beginning and veteran education professionals. The matriculation period allows for a maximum of six years to complete the degree. This degree **does not lead to an initial license** to teach in K-12 settings. Those seeking an initial license to teach should pursue an approved initial license program at the undergraduate or graduate level.

A few things to consider for Summer/Fall 2023 (one-year path that begins in May 2023):

- The M. Ed. in Curriculum requires 33 credit hours. Graduate students are expected to read deeply and widely at an advanced level.
- The *one-year path course sequence* illustrates a one-year progression with guided electives selected by the program (subject to change).
- The program is offered fully online using asynchronous D2L courses with occasional Zoom opportunities depending on the class and instructor. The program is designed for education professionals and welcomes beginning and veteran teachers from a variety of settings.
- The *one-year full-time course sequence cohort* utilizes all summer, fall, and spring terms. Focused five-week sessions (one course at a time) are used during the Fall and Spring terms for Fall 2023 and Spring 2024. GA's are welcome to join the program but should keep in mind that GA/TS contracts do not apply to Summer courses.
- You need a 3.0 GPA, a teaching license (or a pending one), and a submitted essay to be considered for acceptance into the program. The GRE (Graduate Record Exam) is not required for those with a 3.0 GPA. If you have less than a 3.0 GPA you may be asked to participate in an interview process and/or take the GRE at the discretion of the Program Coordinator.
- Undergraduate students graduating in May 2023 who have a forthcoming teaching license are welcome to continue their studies and begin their graduate coursework right after graduation. Seniors can apply for conditional admission in advance of your graduation date. Interested students should consider applying (and for financial aid) ASAP in Feb/Mar/early April due to the early May 2023 program start.
- Financial Aid is available through the Office of Financial Aid: <https://www.etsu.edu/gradschool/funding/paying.php>
- Curious about cost? Check out the ETSU Tuition Estimator: <https://www.etsu.edu/paying-for-college/estimator/>

Ready to apply? Admission is a two-step process. First, apply to the **ETSU School of Graduate Studies** via the online application. You'll be asked to upload transcripts, essay, teaching license (or a statement that it is forthcoming), etc. as the application directs. The graduate school will then forward your completed application to the Department of Curriculum & Instruction. Then, the department will consider your application and make an admittance decision for the program.
