## Verb Selection Guide to Writing Performance-Based Learning Objectives

The following is a quick tool for faculty to use when writing learning objectives that allow the participant to demonstrate the depth to which they can apply their new knowledge. The higher the level, the more rigorous the cognitive demand, so we encourage high level objectives. An effort has been made, in this document, to consolidate Bloom's Taxonomy with Webb's Depth of Knowledge (DOK) Taxonomy to accommodate those who are familiar with either guideline. The associated verbs provided below are a partial list and do not constitute an official AAFP list. They are meant to provide examples for those unfamiliar with either taxonomy.
