

Creating a Random Quiz

A Guide for Instructors

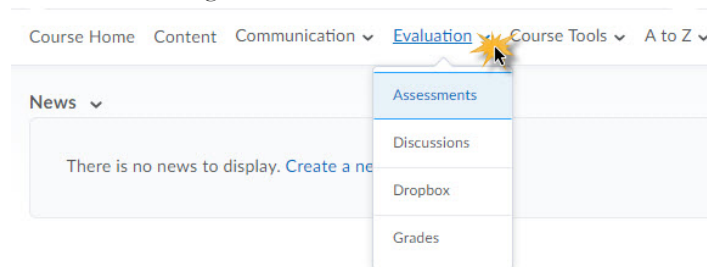

Create a Random Quiz

Creating a random quiz begins in the Question Library. You must have all questions populated in the question library so that you can import the questions into your random section. Follow these steps to create questions in the question library and then import those questions into a random section within a quiz.

Creating a Section of Questions in the Question Library

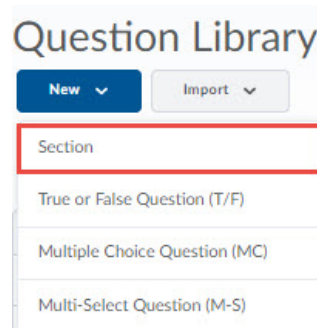

1. Navigate to the **Assessments** tool by selecting **Assessments** from the **Evaluation** link group located in the default course navigation bar.

2. Click **Question Library**

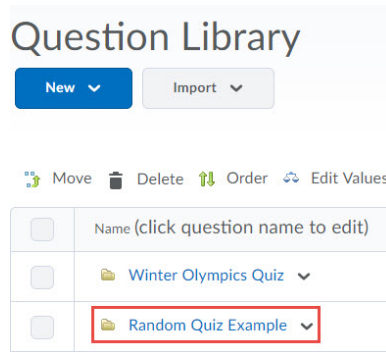

3. Click the **New** button and choose **Section**. In D2L, sections act as folders for the organization of assessment questions. These section folder can organize questions by chapter, topic, or other methods.

4. Give your section a **name** and then click **close**. This action will return you to the question library

A screenshot of the 'General' section of a form. The title 'General' is at the top. Below it, the label 'Section Name *' is followed by a large, empty rectangular text input field.

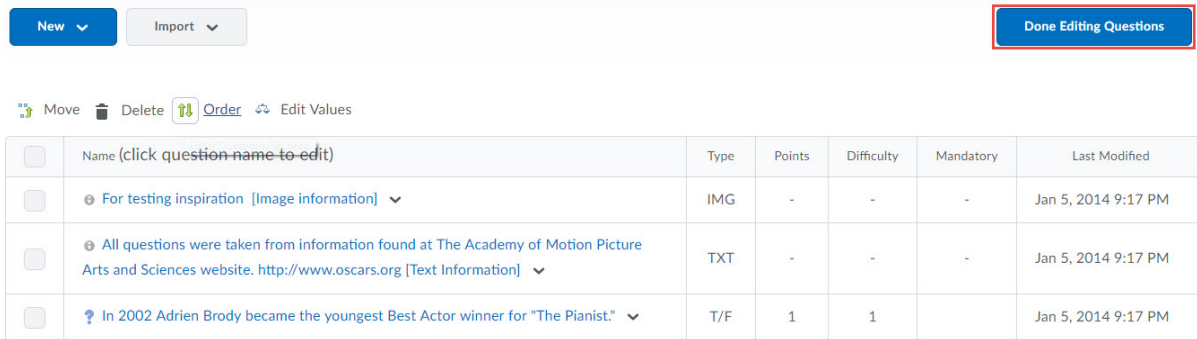

- Locate the section you just created and click on its **name** to open it.

- Click the **New** button and select a **question type**.

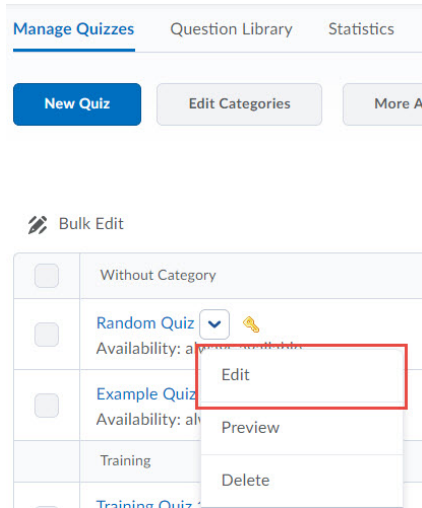

- Complete the question creation process and click **save** when finished.
- Create your question(s) within this folder. When you're finished, click **Done Editing Questions**.

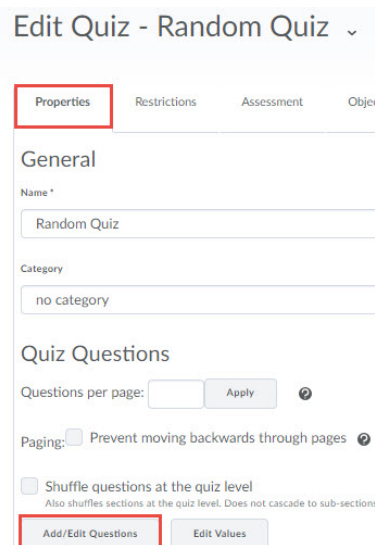

- This action will return you to the **Manage Quizzes** page

Create a Random Section inside a Preexisting Quiz.

1. From the context menu of a preexisting quiz, select **Edit**.

2. On the **Properties** tab, locate and click on the **Add/Edit Questions** button

3. Click the **New** button and select **Random Section**
