*The purpose of this course is to enhance skills and strategies in visual, verbal, and experiential communication regarding the natural world. It delves into fundamental concepts of nature interpretation and visual communication principles, covering historical development, current trends, methods, and field techniques in nature study, outdoor education, interpretive design, and program development. Topics include nature journaling, scientific illustration, basic graphic design principles (such as typography and layout), and practical service-learning projects with regional recreational partners. Design thinking methodology will be employed to develop site-specific projects and explorations in environmental education. Ideal for aspiring park rangers, naturalists, environmental educators, and social media content creators, as well as those with a strong interest in the environment. The course involves significant fieldwork and meetings with industry professionals (e.g., park rangers, trail maintainers, environmental advocacy groups, naturalists). Students will create research-based educational experiences and artifacts in various formats, including visual (photos, videos, graphics, illustrations) and written (blog posts, social media updates, website content).*

*Risograph is a popular printing method used by contemporary designers and artists to create illustrations, prints, zines, and books. Students enrolled in the course will be introduced to printing on the RISO duplicator. Concepts such as image planning, print planning, and registration will be covered through the creation of risographs, in the form of prints and booklets. ETSU Art and Design has a single drum RISO duplicator housed in the VRC for student use. This class will allow access to this machine, with careful instruction on how to use it to create risograph works.*

*This course on digital fabrication in metals will introduce students to digital sculpture and 3D printing techniques with a focus on jewelry design and metals. Students will learn how to use 3D programs, slicing software, and a variety of traditional jewelry-making processes to bring their ideas and concepts to fruition. Programs, software, and processes include Zbrush, Chitubox, and centrifugal casting.*

*Through a series case studies, drawn from distinct historical and cultural contexts, this seminar will address a critical phenomenon in the history of art: collecting. Class sessions will cover a wide range of topics, from foundational readings on the behavior/activity of collecting from a multi-disciplinary perspective (e.g. historical, anthropological, psychological), to focused examinations of collecting and the formation of collections in distinct contexts, to panoramic and diachronic considerations of the public and private origins of the museum and the archive as primary institutions in the art world. The course will culminate in examinations of the current state of collections and informed speculation about the future of collections — especially as they concern increased scrutiny of provenance and the ethical/legal issues surrounding the acquisition, retention, and display of art objects from diverse origins.*

*\*\*BIOL 1010-900 is an ONLINE course offered through the ETSU Biological Sciences Department and REQUIRES A PERMIT to register. Send permit requests along with your E# and course CRN to youngtl@etsu.edu. PLEASE BE SURE TO ALSO REGISTER FOR THE CORRESPONDING ONLINE LAB SECTION, BIOL 1011-900, CRN 84431, WHICH WILL ALSO REQUIRE A PERMIT. \*\* Students will not be required to meet on campus or online at scheduled times. A distance learning laboratory kit is required, and it will be provided by your instructor at no extra charge. For minimum system computer requirements and additional information, please go here: [https://www.etsu.edu/onlinehelp/student\\_help/tech\\_resources.php](https://www.etsu.edu/onlinehelp/student_help/tech_resources.php) (you will need to copy/paste the link). Please be advised you will be responsible for watching/listening to lectures on D2L and completing assignments and assessments by the posted deadlines for each. You will be required to submit electronic photos of yourself performing the home-based lab exercises in order to receive full credit. Other requirements will be addressed by the instructor. Students wishing to attend a campus-based classroom section must enroll in a different section of BIOL 1010. \*\*Textbook required for the online BIOL1010 or BIOL1020 is different from the on-ground courses BIOL1010 or BIOL1020 courses. If you plan to use the same book, be advised to take both the courses as online or on-ground.*

*The course studies the history of various ancient armies, 2500 BCE – 1453 CE. by studying their organizational structure, weapons, and the degree to which cultural values and imperatives shaped the form and application of military force. We will examine these armies' tactical doctrines and specific operational capabilities to seek explanations for how they were shaped by technological opportunities and*

limitations along with social and cultural norms. Students should leave this course equipped with a greater appreciation of how ancient societies formed armies, used technology, and waged warfare. The tools you will learn in this course, such as critical thinking, greater historical perspective, written communication, and a more sophisticated ability to engage in professional discourse can be transferred seamlessly to any major field and any profession.

HIST-3950-002	Sp Top in History: War in the	84491	3	TR	10:10 AM	11:30 AM	A021	229	Class	DONNELLY	HIST	30	17	13	Y
---------------	-------------------------------	-------	---	----	----------	----------	------	-----	-------	----------	------	----	----	----	---

The course studies the history of the Wars in Vietnam from 1945 thru 1975 focusing on the military and civil-military aspects of the Wars. The course will cover the Wars in four periods. The first period covers the return of the French and the introduction of US advisors, 1945-1954. The second period focuses on the work of the advisors and sets the stage for the introduction of US conventional forces during the period 1955 thru 1963. The third period addresses the peak of the US involvement, 1964-1969. The fourth period follows the US drawdown, end of direct US military involvement, the conclusion of the Wars, and the aftermath during the period 1970 thru the present day. We will examine the function and military actions of US, Republic of Vietnam, Soviet Union, Peoples Republic of China, Democratic Republic of Vietnam, and Viet Cong organizations, technology, tactics, and paramilitary operations within the area of operations as well as the diplomatic, informational, social and economic aspects of the Wars, including those actions and effects leading to, during, and following the four periods of conflict.
